

# WHAT IS THE StreamView?

The StreamView is Ayyeka's web interface that allows for easy and intuitive data visualization and effective management of the Wavelet fleet. Its tactical edge analytics allow you to identify critical events and respond quickly.

## MAIN FEATURES INCLUDE:

## VISUALIZATION

- ▶ GPS-enabled asset location to pinpoint devices on a map
- ▶ Real-time data from the field with intuitive charting to identify trends

## DEVICE MANAGEMENT

- ▶ Push commands to devices on a one-by-one or fleet-wide basis
- ▶ Configure threshold alerts for situational awareness

## REPORTS

- ▶ Powerful report generation tools to output data in seconds
- ▶ Filter by site and data stream to compare feeds side-by-side

## USER MANAGEMENT

- ▶ Manage users and roles at the asset-based level
- ▶ Easily update contact information to ensure users receive alerts

## API

- ▶ Generate and manage API clients
- ▶ RESTful web services integration with third party software applications

## FLEET MANAGEMENT

- ▶ Easy configuration of one or thousands of devices
- ▶ Manage and monitor your use of digital services

# SUBSCRIPTION PLANS

For the specific requirements of every use case, Ayyeka provides the ultimate level of flexibility for selecting digital and professional services. Eliminate complexity and reduce the costs of working with multiple vendors, maintaining servers, downloading desktop software, protecting against cyber-security threats, managing single-provider cellular communication contracts, and engaging in IT integration projects. Ayyeka's Subscription Plans and Add-ons provide a streamlined and comprehensive offer of secure cloud hosting; encrypted communication with multi-network cellular data; unlimited user access to the StreamView hub for data and device management; software and firmware upgrades; APIs for data export; alert notifications; and more.

Select one or multiple Subscription Plans – Starter, Industrial, or Enterprise– for your fleet to serve the needs of each use case. Optimize the cost structure across your deployments by switching between plans based on changing needs. Layer one or multiple Add-ons onto the plan as needed to enhance the capabilities of a given device. Utilize the digital and professional services that your use case requires and save on those that may not be needed. The streamlined approach and flexibility in Ayyeka's offering make implementing and scaling your remote monitoring deployment easier than ever.

## Ayyeka's Service Plan

### The Ayyeka Subscriptions and Add-Ons include the following:

- ▶ Cellular (4G/3G/2G) and LoRaWAN data connectivity
- ▶ Cyber-secure data transmission and encryption
- ▶ Over-the-air device configuration and firmware updates
- ▶ Embedded GPS locating and mapping
- ▶ Secure cloud data hosting
- ▶ On-premises data hosting
- ▶ Ayyeka's StreamView data hub and device management software
- ▶ AyyekaGo mobile app for in the field installations and device management
- ▶ Email, SMS, and voice threshold alerts
- ▶ Battery life and device health notifications
- ▶ API for 3rd-party software integration
- ▶ SCADA drivers
- ▶ Email and phone customer support
